<b>COMPANY</b>	YATAŞ
<b>DATES</b>	2022-ongoing
<b>LOCATION</b>	Istanbul, Turkey
<b>POSITION</b>	Architectural Purchasing Specialist

## Additional Information

After experiencing different roles in construction sector, I decided to change my route to find the best option for my career which I want to be satisfied with and it wasn't hard at all when I first met Excel VBA and created a few projects (user forms, excel pranks etc.). After some research and thanks to my mentor who has been working as a software engineer I got down to work to be a professional front end developer. To achieve my goal, I've been learning for more than 6 months, writing my own projects and attending online courses regularly . I believe that I can meet the requirements of any

vacancy in this field considering my education background, proficiency at English language and familiarity with mathematic and engineering problems. I'm looking forward to getting my first job as a front end developer and I would appreciate if you take a look at my GitHub profile: <https://github.com/adilgorkem>
